Conroe, TX 77385

PROFILE

Entry-level software developer with hands-on experience in AI data analysis, Unity game development, and software engineering projects. Strong foundation in object-oriented programming, front-end web technologies, and collaborative development. Seeking a junior software development or IT role focused on building reliable, maintainable systems.

EXPERIENCE

Warehouse Technician, Kingdom Technology Services; Katy, TX — 2021-2024

- Assisted in assembly and installation of electronic and UV filtration components
- Created and documented improved assembly procedures
- Managed inventory and shipping for sensitive technical equipment
- Worked hands-on with hardware in a production environment

AI Data Analyst, DataAnnotation Tech; Remote — 2025-Present

- Review and analyze AI-generated text across multiple evaluation axes, including accuracy, relevance, tone, and instruction adherence
- Apply structured rubrics to evaluate model outputs and provide detailed feedback
- Identify recurring model weaknesses and inconsistencies to improve training quality
- Maintain high accuracy and consistency standards in a quality-controlled environment

EDUCATION

Stephen F. Austin State University, Nacogdoches, TX — Bachelor of Music, 2025

SKILLS

- Languages: Java, C#, JavaScript, HTML, CSS
- Frameworks & Tools: React, Unity, Git
- Game Development: Unity (C# scripting, gameplay logic, UI systems)
- AI / Data Work: Text-based AI analysis, quality evaluation across multiple axes
- Other Tools: Microsoft Excel, Word, PowerPoint
